

# THE AIR ALLERGEN

The pollens

# Diferent kinds of pollens

It exists diferent kinds of pollens :

- .Trees's pollens ;
- .« Nettle rash » pollens ;
- .Ambroisia pollen ;
- .« Herbaceous » pollens and ;
- .Grass pollens.

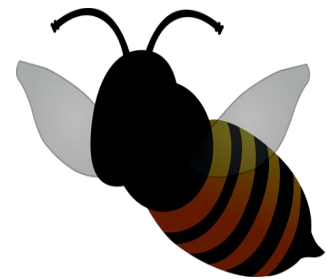

# Where and when the pollens are ?

We find the pollens and the moulds in the air outside of the houses but also inside of them.

There are 3 seasons of pollination :

- .There is precocious season ;
- .There is big season ;
- .And the last season.

# Treatment

There are some treatments who permit to cure allergys :

.The desensitization lets to delete or reduce the effects of an allergy.

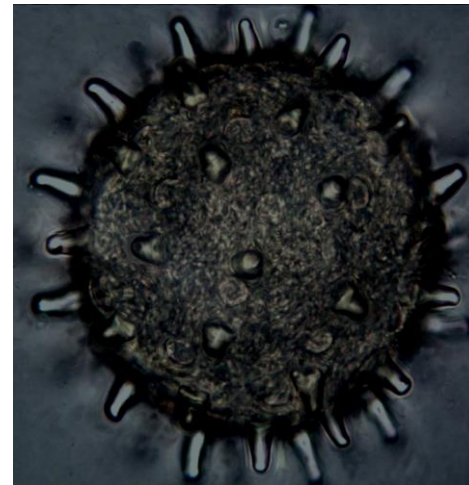

.The corticosteroids are prescribed for their anti-inflammatory properties and used in the case of allergic rhinitis due to pollen in the form of nasal spray.

# About Guiana

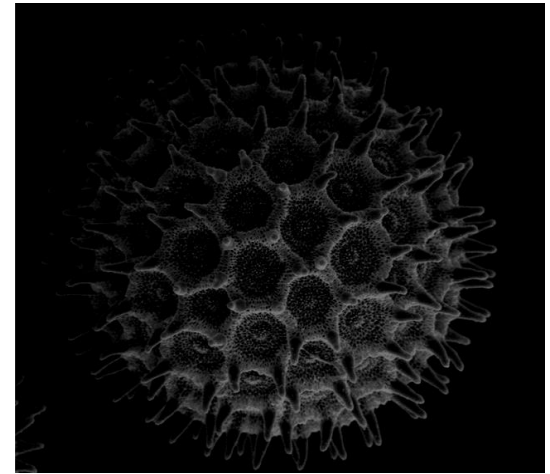

# Experiment 1

.Me and my team we have observed diferent pollens. One of hibiscus, one of ixora, one of flamboyant and one of calliandra.

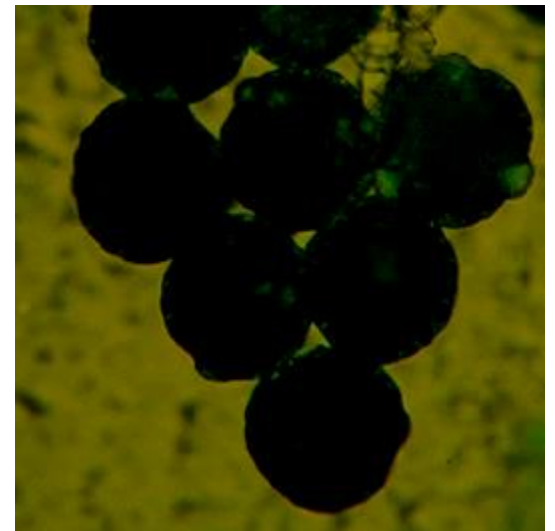

.Here are the results :

Hibiscus

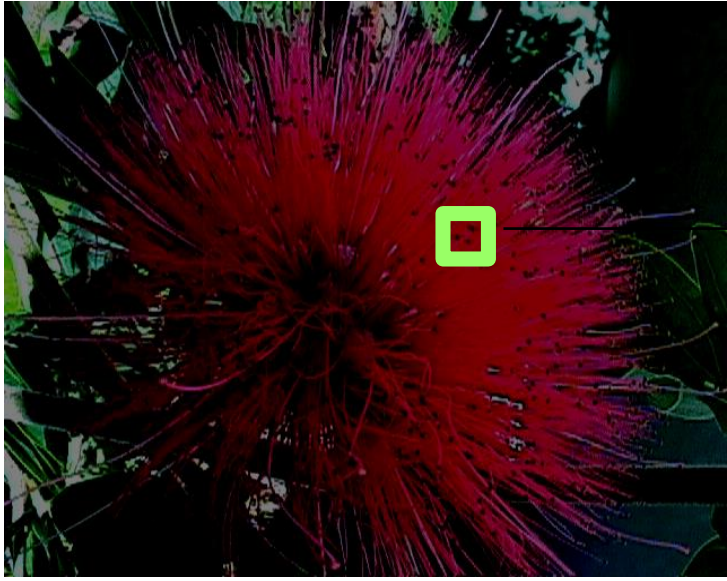

Ixora

Flamboyant

Calliandra

Hummingbird  
pollinating a flower

Xylocopa pollinating a  
flower
